**Friday, October 21, 2011 • Noon**  
*At the Ranch, Morgan, Texas*

# Welcome To The W4 Ranch Production Sale...

*"We invite you to  
view our 2011  
bull and female  
offering..."*

We at W4 Ranch invite you to join us at our production sale. We have put together a set of bulls that I believe will work in any program. These bulls are big, stout, and have the kind of thickness we need to produce the pounds we're all looking for to help our bottom line.

These bulls have also endured some very difficult conditions this year and have held up remarkably well. These bulls, like all the rest, have been developed in our Bull Development Center as described in this year's catalog. I think you will find these bulls very worthy of any kind of conditions you might put them in. They have been fertility tested by Dr. Mark Jackson, and he determined that the bulls are very sound and ready to go to work.

The females in the sale are a set of nice three-year-olds bred to Hudgins Brahman bulls. There are not as many females this year due to the drought and having to move quite a few females early in the year. We hope to be able to get back on track next year and furnish the numbers of females that our customers have come to expect.

This year the sale will be broadcast on the internet through Superior. Also, if we can assist you in hotel reservations, call the ranch or the sales manager. If you have any questions we can help you with, please call Joe or myself anytime. We know you will be pleased with our program and the performance of our cattle. We encourage you to come view the sale offerings prior to the sale. Don't forget our barbeque lunch at 11:00 a.m. We look forward to seeing all of you at the sale October 21.

# The W4 Ranch Bull Development Center

*"Our bulls can work anywhere..."*

**O**ur Bull Development Center is 100 acres that is divided into five paddocks with a 200 feet tall rock hill in the center.

After preconditioning, these bulls are divided by age groups and walked to the paddocks.

On one side of the hill is their water and on the opposite side their feed source.

The distance is a half mile each way and requires climbing the rock hill. This procedure strengthens hocks and feet as well as builds muscle.

Bulls raised in this environment will work anywhere and gain as they are working.

### **CED—Calving Ease Direct**

Expressed as a difference in % of unassisted births influenced by calving ease scores and birth weight. Higher CED indicates greater calving ease in first calf heifers.

### **BW—Birth Weight (lbs.)**

Predictor of ability to transmit birth weight. Negative (-) values mean less birth weight.

### **SC—Scrotal Circumference (cm)**

Directly related to a bull's fertility and reproductive performance. Age at puberty and reproductive performance of females is also related to scrotal EPDS.

### **WW—Weaning Weight (lbs.)**

Reflects pre-weaning growth potential

### **YW—Yearling Weight (lbs.)**

Reflects post weaning growth, up to one year of age

### **Maternal Milk (lbs.)**

Predictor of genetic merit for weaning weight due to milk and mothering ability as expressed through an animal's daughters.

### **IMF—%Intramuscular Fat**

### **REA—Ribeye Area**

365-day carcass ribeye area measure based on ultrasound measurements of live yearling cattle. Higher REA should produce progeny with more muscle.

### **FAT**

Adj. 365-day twelfth-rib carcass fat thickness based on ultrasound measurements of live yearling cattle. Lower EPDs should produce progeny with less external fat thickness.

\* Performance and carcass EPDs are listed for each in the sale. Use them as a tool in making selections for your program.
